

TRANSFORM YOUR HEALTHCARE DOCUMENT WORKFLOWS WITH AI

ABOUT VALOREM REPLY:

We are an elite team of practitioners that envision, build, and implement custom solutions to help businesses succeed as intelligent enterprises and market leaders.

WHAT WE OFFER

Healthcare organizations manage a variety of documents every day, including patient records, insurance claims, prescriptions, lab reports, and more. However, manually processing and analyzing these documents can be tedious, error-prone, and inefficient.

Valorem Reply's **Healthcare Document Intelligence** solution uses AI to automate and enhance document workflows, enabling you to extract and analyze data from various sources, including handwritten forms, recorded voice files, and graphs and charts. Powered by Azure OpenAI, this solution leverages the latest NLP technologies to understand, identify, and highlight key information such as patient demographics, medical history, diagnosis, treatment, and more. This innovative solution can also generate text for documents that healthcare staff need to fill out daily and features an intuitive chat-like interface for users to interact with the system and ask questions about their documents. This saves healthcare workers a significant amount of time, allowing them to process patients more quickly and ultimately resulting in improved patient outcomes.

BENEFITS & ADVANTAGES

- Simple and intuitive interface to upload medical records.
- Fast and effective search to retrieve information.
- Comprehensive analysis of textual and visual data in documents.
- Advanced language features to simplify, summarize, and ask questions.
- Significant reduction of time for generating medical documents.
- Transparent and traceable sources of information.

DELIVERABLES

- Azure services provisioned and AI models trained.
- Review of all possible types of input data.
- AI prompts.
- Training for employees.
