

VALOREM REPLY'S OPENAI SOLUTIONS

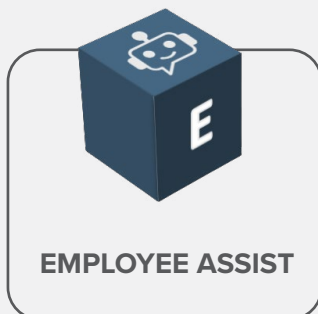

Unlock the value of your data with
Azure OpenAI.

AI Technology is advancing incredibly quickly, grabbing headlines every day. We're seeing a paradigm shift where machines are taking on the responsibility of understanding and comprehension, allowing us to focus more on building meaningful relationships.

At Valorem Reply, we understand that every virtual assistant is unique. We also understand that behind every successful assistant is a set of common patterns, workflows, and technologies. This is why we identified and abstracted the most crucial design aspects and the core capabilities that drive a robust bot to develop a custom virtual assistant solution accelerator.

Valorem Reply's OpenAI Virtual Assistant Accelerators package the core functionality and design considerations required to simplify and accelerate the implementation of any virtual assistant.

OUR ACCELERATORS SUPPORT TWO VARIANTS:

EMPLOYEE ASSIST

CUSTOMER ASSIST

ENTERPRISE • RETAIL • EDU • SDP • INSURANCE • LEGAL • HOSPITALITY • BANKING • MANUFACTURING

EMPLOYEE ASSIST

A personal AI-powered assistant for every employee.

Employees can often be slowed down by repetitive and time-consuming tasks. This can be particularly challenging when they have to juggle multiple projects and applications to access essential information, which can be a major drain on their time and resources.

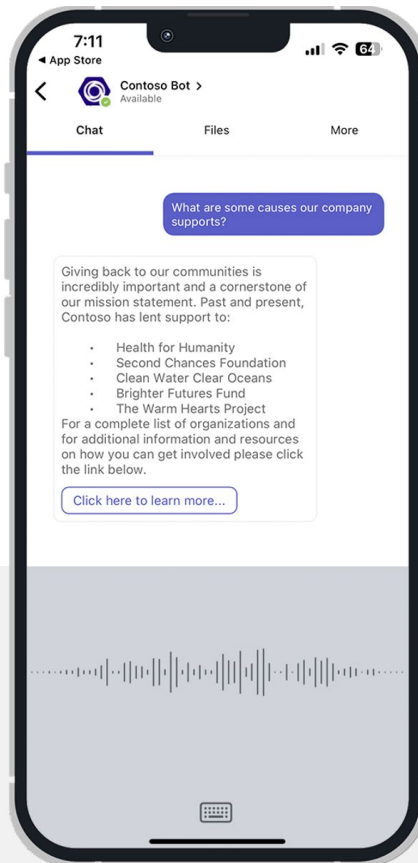

Valorem Reply's Employee Assist Solution is an AI-powered virtual assistant designed to improve the employee's work experience by providing quick and accurate responses to employee queries.

Cost and Time Savings

Intelligent User Experience

OpenAI/ChatGPT Integration

Advanced Analytics and Insights

CUSTOMER ASSIST

Revolutionize your customers' experience with an AI virtual assistant.

Customers today are bombarded with an unprecedented amount of choice and information when visiting a business's website, overwhelming them and leaving them with decision fatigue. Businesses must also navigate an increasingly crowded marketplace where a growing number of products compete across multiple channels, making it more challenging to capture and retain customers' attention.

Valorem Reply's Customer Assist solution is an AI-powered virtual assistant designed to provide customers with a seamless and personalized digital experience that meets their unique needs while delivering business insights that drive better decision-making.

Pre-Built Components

Dialogs (welcome/ help/ quit), Feedback modules, AAD authentication

AI Features

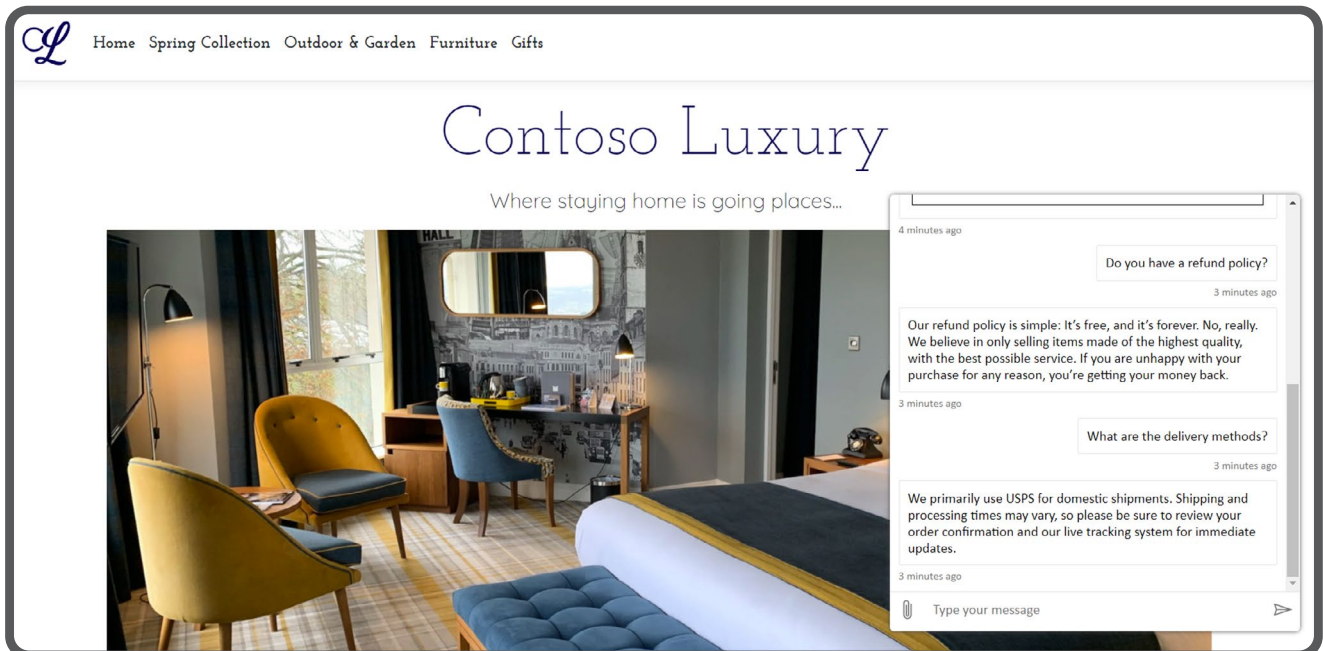

Azure Open AI (GPT/ ChatGPT) – NLU, NLG, Simplification, Translation

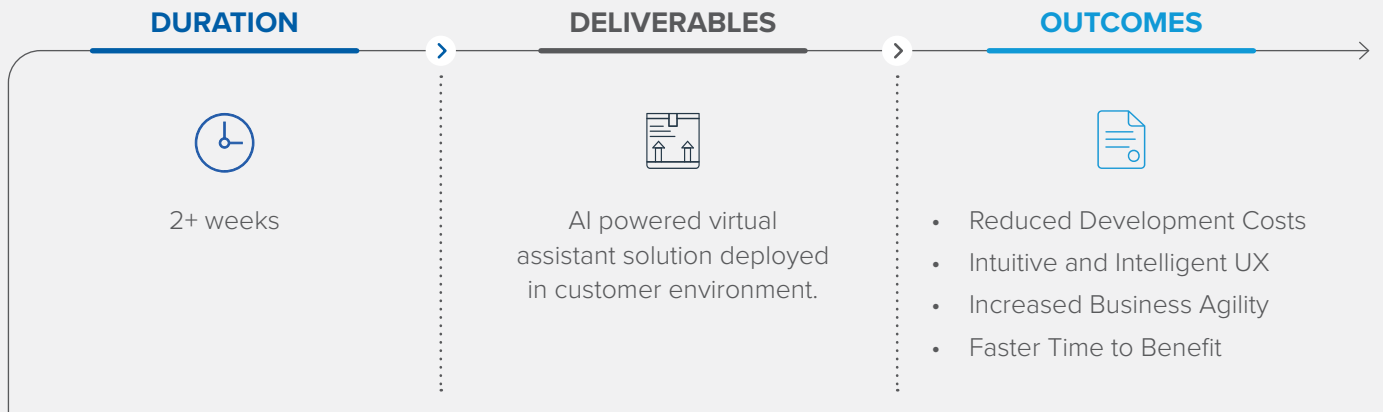

Actionable Insights

PBI Reports for Bot Analytics and Conversational Intelligence

Ready to Deploy

Teams hosted, Multimodal (text, tap, voice), Azure hosted

We make AI real. Ask us how.

Every day, we are imagining new and exciting ways to use Azure Open AI (GPT/ChatGPT). The possibilities are endless. Contact us today to learn more and get started!
